

THE P2000 4G

RAPID Compatible Radio

The P2000 4G combines the proven rugged durability and form of a traditional high quality digital radio with RAPID technology. With a superior quality internal mic and speaker, and commercial grade accessory adaptor for the remote speaker microphone or earpiece, the P2000 4G performs in even the most demanding conditions.

RAPID is the next generation of instant, high-speed, and secure two-way radio communications for voice and data. It is designed and built on a revolutionary all-Australian secure protocol, Intelligent Radio Protocol (IRP®) to ensure true one-to-many communication performance. With RAPID technology the P2000 4G eliminates the coverage restrictions previously faced with traditional DMR/LMR PTT communications. Users can now use RAPID for both individual and group calls over cellular (3G/4G) or Wi-Fi. This unit has enhanced encryption capabilities which provide a superior level of security on transmitted messages.

P2000 FEATURES:

- ✓ 2 W speaker provides loud, clear audio
- ✓ Rugged connectors
- ✓ Android GO
- ✓ Long-life 4,000 mAh battery
- ✓ Heavy-duty antenna
- ✓ Traditional radio casing
- ✓ RMS & accessories

ACCESSORIES:

Speaker Microphone

Desktop Charger

KEY FEATURES:

Instant Call Up-Take

Loud & Clear Audio

Global Coverage

3G/4G or Wi-Fi Networks

Device Integration

Rapid Command

RAPID Command is a management system for RAPID that can be installed on your desktop computer. This management system provides you with accurate and timely information to ensure safe and efficient operation of your enterprise. Rapid Command is the ultimate real-time visual interface solution that provides the ability to manage and support team communications across the network with an up-to-date geographical interface using Google Maps and system features.
